### In this issue:

- New Fleet Management Interface Launched
- Connected Farm Dashboard Video
- Simplify Data Transfer with Office Sync
- Support Note: Using the Scout App with Farm Works Software
- Farm Works Online Training Schedule

### New Fleet Management Interface Launched

A new and exciting interface is now available for the fleet management software. Fleet data can now be accessed from any computer, tablet, and smartphone with an Internet connection. It is also better integrated into the dashboard for accessing other important information such as commodity prices, weather, rainfall totals, field operation maps, and more. Easily toggle between the dashboard and your detailed fleet information with one click.

Other new fleet features include:

- View CAN Bus information for each vehicle in a graph.
- Manage geo-fences easier with new controls.
- Filter your equipment list by name, type, and group.
- Utilize a new enhanced grouping interface for vehicles and operators.

### Connected Farm Dashboard Video

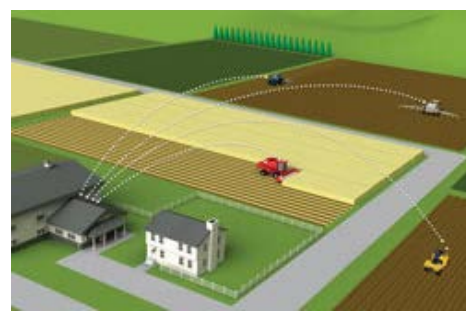

Watch and learn how the Connected Farm™ dashboard can benefit your farming operation. The video explains how the dashboard can be customized and accessed from any mobile device using the Internet, including Trimble's new TMX-2050™ display. Information from the dashboard can be used to make timely decisions about field operations, irrigation, fleet logistics, and more.

### Simplify Data Transfer with Office Sync

Office Sync, part of Trimble's Connected Farm™ solution, allows you to send and receive data files wirelessly between the office and field. Guidance lines, yield data, prescriptions, as-applied maps, and other data files can be sent and received wirelessly while backed up on a secure Trimble server network. Original data files can be accessed at any time and shared with trusted advisors such as resellers, co-ops, or agronomists.

Key benefits:

- Avoid using USB drives for data transfer.
- Provide quick access to data for instant analysis.
- Save time chasing operators in the field for data file updates.
- Protect original data files by storing them on a secure Trimble network.
- Access your planting and application data instantly via the Connected Farm dashboard.

### Support Note: Using the Scout App with Farm Works Software

Farm Works™ version 2014 or higher has the ability to import data collected from the Connected Farm scout app. Data such as field boundaries and scouting data that includes attributes for flags, polygons, and lines. Not only can you access your scouting data online using the Connected Farm dashboard, but also with your Farm Works desktop software in just a few easy steps.

This [FAQ](#) explains the steps for linking your Connected Farm scout app account to Farm Works.

### Farm Works Online Training Schedule

Online classes provide one hour of training with time available at the end for specific questions. Each session is \$30 and high-speed Internet is required.

Training Date	Time (EST)	Topic	Register/Info
