

Connected Farm eNews

August 2015 Edition

AUGUST 12, 2015

In this issue:

- Scout App 3.0 Now Available
- Get \$1000 of Rainfall and Crop Health Maps for Free
- Process UAV Data in Connected Farm
- Access VarioDoc and AgCommand Data in Connected Farm
- Countdown to Farm Progress
- Farm Works Online Training Schedule

Scout App 3.0 Now Available

Take advantage of the newest version of the Connected Farm™ Scout app. We made superb enhancements to the user interface that are critical for everyday mapping and scouting tasks. Data from the Scout app 3.0 is not currently compatible with Farm Work Software®; however, an update to Farm Works will be coming soon, adding the ability to support these new updates.

Key enhancements:

- View crop health imagery in the background to help with targeted scouting
- View previous scouting history
- Move logged flag locations
- Switch among organizations once you login to your Connected Farm account

Download app from [iTunes](#) or [Google Play](#)

Get \$1000 of Rainfall and Crop Health Maps for Free

As a token of thanks to our Farm Works version 2015 customers, we are offering \$1,000 in free Connected Farm rainfall and crop health maps. If you are using an older version of Farm Works, update today for only \$300!

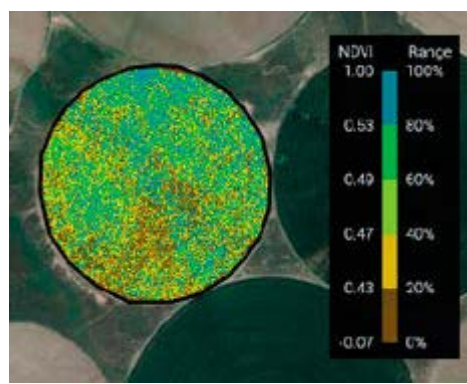

- Use \$500 now for buying RainWave® precipitation monitoring solution data to monitor rainfall on fields throughout the growing season
- Use \$500 later to purchase the PurePixel™ precision vegetation health solution to measure vegetation health during the growing season to quickly identify potential issues with your crops

Special offer only valid in the U.S.

Process UAV Data in Connected Farm

Connected Farm now processes Normalized Difference Vegetation Index (NDVI) maps from imagery captured by unmanned aerial vehicles (UAV). Compatible UAVs include Trimble's UX5 and the UX5 HP (coming Q4 2015) as well as other 3rd party UAVs with cameras adapted for color infrared (CIR) imagery. When a flight is completed, you first post-process the CIR images into a composite mosaic for uploading into Connected Farm. In Connected Farm you view your imagery in the context of your field boundaries, where you can order NDVI maps for crop health analysis.

Access VarioDoc and AgCommand Data in Connected Farm

Trimble has partnered with AGCO to integrate data from AGCO's VarioDoc and AgCommand® systems into Connected Farm. Growers can now access AGCO machine data on the Connected Farm dashboard, making it easier to monitor their entire operation from one location.

Countdown to Farm Progress

Make the most of your time at Farm Progress by checking out the latest innovations in precision farming and data management. You'll find us at one of three locations – Main Booth, UAV Showcase, and the Ride & Drive. Our experts will be available for hands-on demonstrations as well as presentations every 15 minutes that give an overview of Trimble/Connected Farm solutions. So make sure to stop by and see us!

Farm Progress Show

September 1-3, 2015
Decatur, Illinois, USA
Booth 9N (Trimble main booth)

Farm Works Online Training Schedule

Online classes provide one hour of training with time available at the end for specific questions. Each session is \$30 and high-speed Internet is required.

Training Date	Time (EST)	Topic	Register/Info
August 17, 2015	11am	Basic Set Up of Mapping and Field Records	REGISTER
August 19, 2015	11am	Mapping – Importing Yield Data & Imagery	REGISTER
August 24, 2015	11am	Mapping – Using Soil Types for Sampling Grids & Management	REGISTER
August 27, 2015	11am	Mapping – Importing Soil Lab Data & Creating Simple VRA Maps	REGISTER
August 31, 2015	11am	Mapping – Creating Formula Based Prescription Maps	REGISTER
