

Connected Farm eNews

May 2015 Edition

7 MAY, 2015

In this issue:

- Updates to Connected Farm
- Updates to Farm Works Software
- Use Connected Farm Advisor to Streamline VRA Prescription Maps
- Plan Your Corn Maze in 2015
- Monitor Rainfall for Each Field
- Farm Works Online Training Schedule
- Free Webinars on Connected Farm

Updates to Connected Farm

Connected Farm™ Fleet

- Support for one minute location updates (previously was 15 minutes)

Connected Farm Field

- New task area that allows you to filter date, crop, client/farm/field, material, and more
- Shapefile import for field boundaries

Connected Farm Advisor

- Build your own formulas which support direct and nested linear, quadratic, freeform and conditional expressions
- Custom formulas can be made private or public

Updates to Farm Works Software

The following enhancements are now available in Farm Works™ version 2015.04.

All Programs

- Scroll wheel on mouse is now supported on all reports

Farm Works Mapping

- Updated support for Office Sync with CFX-750 display
- Support for updated Ag Leader firmware
- New report that shows planting statistics by row (for CNH data only)

Farm Works Surface

- Warning message added if a levee line exceeds a set tolerance in elevation
- Added buffer functionality for clipping to levees

Use Connected Farm Advisor to Streamline VRA Prescription Maps

If you are a trusted advisor and looking for a solution to streamline the process of creating prescription maps for your customers, then you need to learn more about Connected Farm Advisor.

Features:

- Build your own or select from a wide range of pre-built formulas to make your fertility recommendations
- Create prescription maps for multiple fields while easily sharing them with grower customers
- Review and adjust variable rate prescription maps before purchasing

Plan Your Corn Maze in 2015

Utilizing GPS technology to design and cut your own corn maze can be fun and profitable. Where do you start? Farm Works offers the perfect combination of software and mobile solutions to create your own maze. This solution can handle anything from simple designs to more elaborate mazes that people will be talking about for years.

Monitor Rainfall for Each Field

Do you want to track rainfall variability across your fields? Unlike other competing solutions, RainWave® Contour Map allows you to see precise rainfall variations within an entire farm or across fields. This information is extremely helpful with irrigation or managing fleet operations during the growing season. RainWave Contour Maps are compatible with third-party software by exporting the data in a shapefile format. Overlaying these maps with yield or other precision maps can help understand yield variability.
