November 2015 Edition

NOVEMBER 19, 2015

In this issue:

- Raven Slingshot Now Compatible
- AGCO VarioDoc and AgCommand Data Integration
- Updates to Connected Farm
- Scout App Reaches 100,000 Downloads
- Free Trial with Connected Farm Standard

Raven Slingshot Now Compatible

Connected Farm™ can now view task data and as-applied maps transferred wirelessly from Raven's Slingshot® system. By tapping into the Slingshot API, Connected Farm is able to communicate with Raven field computers, such as the Viper Pro™ and Viper® 4 to wirelessly transfer field data and locate equipment in the field. The integration between the Connected Farm platform and Raven Slingshot data provide growers a more complete picture of their field activities and enable them to make real-time decisions for variable rate prescriptions, work orders and resource deployment. The Raven Slingshot integration is now available in the Connected Farm Standard package.

AGCO VarioDoc and AgCommand Data Integration

Connected Farm continues to expand its offerings with complete integration of AGCO's VarioDoc and AgCommand® systems. This allows Connected Farm customers to access their AGCO machine data, via AGCO's telemetry product, AgCommand as well as their agronomic data through AGCO's VarioDoc task file management platform, from within the Connected Farm dashboard. This deeper integration with AGCO delivers a more streamlined approach to total farm management using a single, Web browser-based user interface.

Updates to Connected Farm

Data Support and Transfer

- Enhanced integration with AGCO and Raven systems
- Added support for sending resource files to Trimble® CFX-750™ display
- Improved import process when using large UAV (Unmanned Aerial Vehicles) files

Connected Farm Field

- New "Files" tab includes details such as File Type, Transfer Method, Date, Size, and Status
- Legend for task map now includes an information button for displaying Minimum, Maximum, and Average

General

- New enhanced lighter color theme that improves readability on devices in brighter environments
- Better handling of field tasks from the Connected Farm Field app from iOS devices
- German and French translations

Scout App Reaches 100,000 Downloads

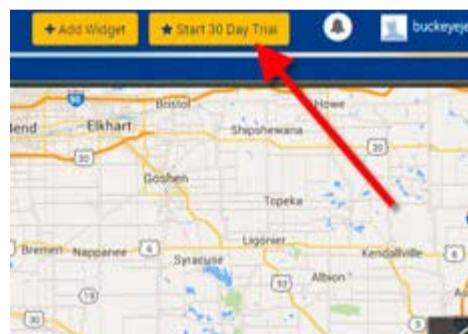

We are celebrating over 100,000 downloads of the Connected Farm Scout app, making it one of the most popular apps in precision agriculture. Farmers and advisors use the app to collect field boundaries, mark flags, and enter scouting information about weeds and pests. All data collected from the app transfers wirelessly to Connected Farm Free (web platform) and Farm Works Software® (desktop platform that requires the latest Update Service Plan).

Download app from [iTunes](#) or [Google Play](#)

Free Trial with Connected Farm Standard

If you are using the basic Connected Farm features for free, now is the perfect time to try out Connected Farm Standard for 30 days at no cost. Just login to your Connected Farm account and click the "Start 30 Day Trial" button. Once you click the trial button, you will immediately experience the additional features of Connected Farm Standard. Also keep in mind if you are using a Trimble display (TMX-2050™, FMX®, or CFX-750) with a DCM-300 modem, the 30 day trial allows you to wirelessly transfer your task data into Connected Farm and Farm Works Software.

Connected Farm Standard Features:

- Advanced precision mapping features (unlimited map zooming and legend)
- Advanced fleet management features (productivity, utilization, alerts, position history)
- Unlimited in-season crop health
- Unlimited processing of UAV imagery
- Fleet and task data from other platforms (i.e. Raven Slingshot and AGCO AgCommand)
