New and Improved Connected Farm Website

We have launched a brand-new Connected Farm™ website that offers many improvements for the mobile farmer. Using the latest web technology, we have now delivered a website that is easy to access from any mobile device. We look forward to continue improving the site to bring you the latest in news and product information.

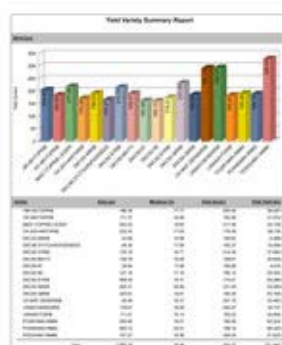

Some of the key enhancements include:

- **Optimized for all mobile devices** – the website is easy to view from smartphones, tablets, or any connected device
- **Release notes** – keep up-to-date on the latest changes
- **More product information** – access videos, pricing, and online assistance
- **Current news** – view press releases, testimonials, and other important topics

Yield by Variety Graph Report

Did you know that Farm Works Software® version 2015.07 includes a new **Yield by Variety Graph Report**? It is one of the most popular reports in Farm Works. Just go to the Reports button and select the Field category to find the new report. This report compares your planting data to your yield data and displays a graph to better understand which seed varieties performed the best.

Prepare for Soil Sampling Season

With spring just around the corner, farmers are starting to prepare themselves for the upcoming growing season. Part of that preparation involves learning more about the soil nutrient levels for each field. We asked Chris Eschhofen of Eschhofen Systems to give us some quick tips in soil sampling this spring. His company samples thousands of acres in Northwest Ohio while providing consulting services from the collected data.
